

## Ethics

Research and innovation must respect fundamental rights and adhere to the highest ethical standards, be aligned with societal values and share responsibility for the impacts of science, reflecting on society's ideas and concerns.

## Governance

Integra Cloud guarantees a transparent and reflective governance, sharing the progress and results of the project with the actors of the Valencian health system to which the Department of Health Clínico-Malvarrosa belongs.

## Open science

Integra Cloud will have a website and social networks open to the public, as well as informative videos and public demonstrations for the scientific community, the media and society.

## Gender equality

Integra Cloud is a project with a multidisciplinary team, with equal gender representation, ensuring that the gender dimension is present to improve the quality and social relevance of the results.

**Ethics and security to guarantee data protection. Integra Cloud complies with the RRI principles.**

## Science education

Integra Cloud promotes science education, training and critical thinking, based on social, economic and ethical principles, to open a window of knowledge linked to its research and guarantee a better future for science.

## Citizen participation

Integra Cloud advocates a model of citizen participation, where users' comments related to the use cases will be taken into account.
